

## WCT Jackaroo™ Canvas for Hannibal Safari Equipment

# Specification Sheet

Jackaroo is a high quality, light-medium weight, blended polyester/cotton tent canvas. The fabric is a very tightly constructed fabric that is woven from fine yarn counts and produced in a tear stop weave.

Jackaroo is designed specifically for higher quality family frame tents and designed to withstand the toughest of environmental conditions. The proofing process allows for excellent water and rot resistance while also maintaining 'breathability' and no condensation to develop on the inside of the tent.
