

What are they made out of and how are they constructed?

The Hannibal fold out roof top tent is a class-leading RTT for quality. We use the best quality Australian components to make the best roof top tent in the world.

- Tent canvas is Dynaproofed Australian made canvas 380-gram Polyamide breathable cotton canvas for tent body.
- 280 GSM Australian Made canvas is used for the window hoods and wall systems.
- Flysheet has a vinyl waterproof roof with 210 denier Oxford Nylon sides.
- The fly is suspended above the tent by an additional bow to ensure insulation gap.
- All tents have our unique anti pooling pole system to prevent water pooling in Jumbo flysheets.
- The transit cover uses Australian Made 600 GSM Vinyl from WCT (Wax Converter Textiles).
- Australia made Dunlop 75mm High Density Ultra Fresh foam mattress.
- A dual layer Dunlop foam mattress option is also available.
- The mattress has a cover which is zipped for laundering.
- The foam mattress is in 2 pieces and retained in a cotton drill cover with 2 compartments. This means the mattress folds flat when the tent is closed enabling more useable space in tent.
- Quality Bondex zippers that meet all Australian standards are used extensively throughout the tent.
- All seams are double stitched with (S25) UV thread and edged with binding and waterproofed.
- The base board is resilient 12mm marine ply/external construction ply for insulation and strength.
- All windows and doors open fully for ventilation.
- All windows and doors have Midge screens to keep out the insects.
- Elastic cords are located inside the tent to assist with drawing the canvas in when closing the tent down.
- Pockets are inside the tent to store sundry items.
- 3mm 304 Grade Stainless steel hinge retain the 2 baseboards.

- The internal tent frame is gusseted for extra strength.
- Aluminum extrusion is used for locating base boards to ensure strength and rigidity.
- 5mm spring steel awning stays are used for window hoods and flysheet.
- Internal poles are anodised to prevent problems due to oxidation of aluminum.
- Hannibal use a unique 2-piece ladder with wide treads for tender feet.
- The ladder is easily adjusted for various vehicle height options.
- Wider ladders and Telescopic ladders are available upon request.
- Fly sheet extends past the doors for better rain and wind protection.
- All Hannibal tents are covered by a 5-year warranty against manufacturers and material defects.
- We can customize your requirements just ask when ordering.
- A number of useful options are available to increase functionality of the tent.
