

## Jumbo Kit Packing List & Assembly Instructions

### Parts List

- \* Upright poles with elbows
- 1 \* cross bar (pre-drilled)
- 16 \* self tapping screws
- 2 \* rivets
- 2 \* rope channel sections
- 2 \* female ball joint clips

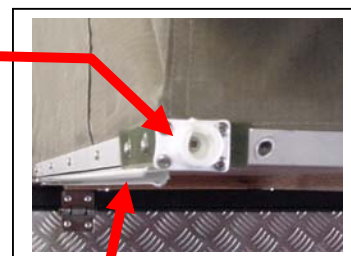

### Fitting Instructions

- Attach middle pole to uprights, assemble on a flat surface to ensure uprights are in line.
- Drill through pre drilled hole in tubing into plastic elbow
- Rivet together with supplied rivets
- Do the same on the other side.  
(check figure 1.)

**Fig 1**

- Position female clip as per pic.
- Pre drill through the corner holes using a 3mm bit. Make sure you angle the bit to catch the aluminium angle beading - not necessary to do the one in middle as per pic. Attach with 4 self tappers  
(check fig 2.)

**Fig 2.**

- Affix rod guide / sail track to the underside of the base board. (Check fig 3). The "C" section of the Rod guide / sail track facing out as per Fig2, and fasten using the remaining self tappers. (No need to pre drill these as you will be drilling into marine ply)

**Fig 3.**

### To open:

- Fasten assembled U tube spreader bar with the 3 velcro straps found in extended fly section.
- Pop ball from spreader bar into female housing. (check fig 2.)

### To fold away:.

- Remove walls, fold and pack separately.
- Unclip spreader bar, as you fold the tent over, lay the bar with the flysheet on top of the folded tent.
- Pull over pvc cover as usual.
